

## LARGE HOT TABLE FOR CANDY MAKING - HT01

**IDEAL FOR PREVENTING A CANDY BATCH FROM COOLING TOO QUICKLY, LEAVING YOU WITH MORE TIME TO WORK MALLEABLE CANDY INTO THE FINAL PRODUCT.**

The Loynds Candy Hot Table HT01 is designed to effectively manage the temperature of candy batches, preventing them from cooling too quickly. This is beneficial for crafting complex confectionery products that require more time for shaping and detailing.

Manufactured with a stainless-steel box section frame and a sheet steel top, the HT01 is built for durability and easy maintenance. Its robust construction ensures reliable performance in a professional candy manufacturing setting.

The standard HT01 model includes 1kW electrical heating elements, capable of heating the surface to a maximum of 65°C. For processes that require higher temperatures, additional heating elements can be fitted to increase the available heat output of the table.

The tabletop is coated with a special non-stick, food-grade vinyl, enhancing the ease of handling candy and preventing sticking. This not only improves the working process but also adheres to food safety standards.

### FEATURES

- **Durable Stainless-Steel Frame:** Ensures longevity and simplifies cleaning.
- **Adjustable 40mm Screw Feet with Wheels:** Facilitates easy levelling off the table in various environments or screw in to use the wheels.
- **Standard Voltage Compatibility:** Comes with a standard 220v setup, with other voltage options available upon request.
- **Non-Stick Food-Grade Vinyl Surface:** Aids in efficient candy handling and meets safety regulations.
