

LOW / MEDIUM VOLUME DIE FORMED CANDY LINE – MCL

A SEAMLESS AND EFFICIENT SOLUTION FOR MANUFACTURING UP TO 125KG OF DIE FORMED CANDY SWEETS PER HOUR.

Designed with small-batch production and recipe development in mind, the MCL Mini Candy Production Line delivers a streamlined process for producing up to 125kg of high-quality rotary die formed candy sweets. All housed within an ultra-compact 5.2-metre setup, this line is an ideal choice for artisan candy makers and innovators as well as being ideal for use in recipe development kitchens for larger manufacturers.

Additionally, the line is popular with cannabis infused candy manufacturers due to its low waste and small batch size processing capabilities.

Purpose-built for small-scale operations, the machinery can be table-top mounted or equipped with separate operator height stands, requiring only a minimal footprint for setup.

FEATURES

- Capacity: Up to 125kg/hr (when paired with a full-size cold table and cooker)
- Small footprint for a fully automatic rotary die formed candy line
- Constructed from food grade stainless steel, the machinery guarantees robust performance and ease of cleaning.
- All equipment has been designed to be very simple to use, maintain and clean meaning no specialist skills are required to run this equipment.

STICK-MASTER PRODUCTION LINE

SPECIFICATIONS

Overall Length
5180mm

Overall Height
1690mm

Capacity
Up to 125kg/hr (when paired with a full-size cold table and cooker)

Total Weight (without stands)
575Kg

Overall Width
665mm

Material
Food-Grade 304 Stainless Steel

Power
Single Phase

Products
Hard Candy.
